TECHNICAL DATA SHEET ASPHALT SHINGLES

STARTER STRIP

DESCRIPTION:

Starter Strip shingles are made from traditional 3 tab square cut design shingle from which the exposure portion has been mechanically cut-off. **Starter Strip** shingles are made of a fibreglass mat and surfaced with mineral granules.

USES:

Starter Strip will save valuable time during the installation of the first course of shingles. Rather than cutting the full size shingles out of the bundle, simply install the **Starter Strip** at the eaves and the rake edge. The insta-bond adhesive strips are already in place allowing for first course of shingles to seal properly. Refer to application instructions for further details.

STORAGE:

Store on a flat surface no more than 3 pallets high.

PHYSICAL PROPERTIES

Coverage (approx.)/bundle	21 linear meter (69 linear feet)
Dimensions	1000 mm x 193.6 mm (39 3/8" x 7 5/8")
Shingles/bundle	21
Bundles / Pallet	70
